

This letter is to urge you to leave satellite radio alone. I switched to xm to get music without the commercials, FCC oversight and someone else's opinion on what programming I have the options of listening to. I pay a fee for this right, I also have a right to listen to all channels no one should have an exclusive on information that benefits the public. The information should be available to all people that take signals out of the air. They should not be penalized because they choose to receive a different type of programming without the clutter of contests and commercials. Please leave the satellite radio companies alone. I want my 1st amendment rights preserved to draw information where I want not where others want me to.
